

## DUNE DINING TABLE

*The integral meeting place.*

A considered component of the living area, this dining table is monolithic, bone-like by design – cement reimagined as an artful, meaningful material. Life abounds around its hand-pressed and solid shape, lending space to pause, converse and reflect.

Using a resin mould to create the bone-like base, bleached concrete is hand-pressed and moulded into the form, resulting in a slightly textured structure. Consisting of a curvaceous, flowing base and a solid tabletop – the combined piece weighs in at more than 180kg. It's reminiscent of sand dunes and the distant horizon, designed to pair with the Dune Side Table or Dune Seat.

**DIMENSIONS** 1900w x 1800d x 750h (185kg approx.)

**SPECIFICATION**

- Hand pressed concrete
- Off-white with a clear seal
- Table thickness between 70-80mm
- Seats between 8-10 people
- Assembled on delivery
- Recommended for indoor use
